TOSIBOX AWARDED ISO 9001 CERTIFICATION

Quality assurance plays vital role in IoT security development

Tosibox, a Finnish company offering secure remote connection solutions, has been awarded the ISO 9001 certification. The scope of certification is the development, licensing, manufacturing and delivery, and marketing and sales, of secure connection solutions, products and services for the Internet of Things.

ISO 9001 is a global quality control and assurance standard. The ISO 9001 certification emphasizes e.g. a strong customer focus, the motivation and implication of top management, the process approach and continual improvement.

“Our ultimate goal is to create a global standard for secure remote connections. Being awarded a global certification is one building block in reaching this goal. It immediately signals to our customers that we continuously focus on developing our high quality operations and processes, and, through this, the quality of our offering. Security is a cornerstone of the Internet of Things, and we want to be at its core,” says Tosibox CEO Tero Lepistö.
