## TOSIBOX INVITED TO EXCLUSIVE ICT BUSINESS MATCHING EVENT IN JAPAN

---

*Finnish leader in remote access and IIoT security chosen among 20 European companies to visit Japan as part of ICT mission organized by EU-Japan Centre in November 2017*

The Finnish growth company and developer of the world's best and most secure remote access solution, [Tosibox](#) has been invited to join an exclusive ICT partnering event in Tokyo, Japan. The [EU-Japan ICT Business Matching Event 2017](#) organized by the EU-Japan Centre is to take place with the support of the Japan External Trade Organization and the Smart IoT Acceleration consortium on Tuesday, November 7, 2017, followed by the world's leading IT trade show, Japan IT Week.

Established in 2011, Tosibox is taking the world by storm with its groundbreaking remote access solution for IIoT. The technology company solving today's industrial problems is on a fast track for growth, with its [products](#) being used in 119 countries and counting. Most recently the company [announced](#) its entering into the South American market through a strategic partnership in Brazil. Tosibox partner network is constantly expanding, creating more opportunities for fluid growth. In Asia, Tosibox already has partners in Singapore, Thailand, South Korea and Malaysia.

"Our innovation has global demand, and further accelerating export sales is the only way to respond. We are looking into further entering the Asian market, and being chosen for this event is both an honor and an invaluable opportunity for Tosibox. We look forward to many fruitful encounters related to the event," said Tero Lepistö, CEO at Tosibox.

Within the selection procedure, the EU-Japan Centre focuses on companies developing cutting edge technologies in the specific targeted sector and whose activities match to the Japanese targeted technology fair in Japan.

For the past three decades, the EU-Japan Centre has played a significant role as a bridge between Europe and Japan, and in recent years the focus of its activities has been in supporting SMEs. Their unique event provides European and Japanese companies and clusters/organizations with the opportunity to have face-to-face meetings leading to possible business opportunities, establishing relationships with potential partners (trade and technology) and initiating collaboration between industry associations or cluster organizations. Event target fields include Internet of Things (IoT), information security, and more.
