PROFESSOR OF CYBER SECURITY JARNO LIMNÉLL JOINS TOSIBOX BOARD

Professor of Cyber Security at Aalto University shares his expertise with the Finnish growth company developing secure remote access technology.

Cyber Security specialist **Jarno Limnéll** has been appointed in a general meeting to join the board of [Tosibox Oy](#).

Jarno Limnéll is Professor of Cyber Security at Aalto University and an adjunct professor in three other Finnish universities. He has previously worked as VP, Cyber Security at Insta Group. Limnéll has a Doctoral Degree in Military Science and a Master's Degree in Political Science, and his military rank is Captain (ret.).

"Tosibox is a very interesting company that has succeeded in solving a troublesome and time-consuming issue in a simple manner and – most importantly – without neglecting the issue of cyber security. I am glad to become a part of this Finnish success story, and I want to offer my experience and expertise into the company's use", Limnéll says.

"The Internet of Things continues its fierce growth also in the coming years, and the significance of cyber security is at its peak. The TOSIBOX® technology offers a unique way of securing connections while taking advantage of the possibilities that IoT offers. Jarno Limnéll's expertise will bring welcomed additional vision to security and other aspects in our board", says Tosibox CEO **Tero Lepistö**.

Established in 2011, Tosibox Oy offers an easy and secure remote access to the internet that is widely used in building and industrial automation and the security industry. The solution enables the setting up of IoT environments and their easy access management. The company's consolidated turnover last year was over EUR 3.3 million with 62% from export sales.

In addition to Jarno Limnéll, members of the Tosibox board are **Markku Tapio**, **Satu Yrjänen**, **Mikko Siivola** and **Veikko Ylimartimo**.
