TOSIBOX® LOCK 500 UP FOR CONTROL ENGINEERING 2019 ENGINEERS' CHOICE AWARD

TOSIBOX® [Lock 500](#) has been chosen as a Finalist in the Industrial Internet of Things Connectivity category.

The Control Engineering Engineers' Choice Awards highlight some of the best new control, instrumentation and automation products. Tosibox Oy, a Finnish company specializing in IoT connectivity solutions, secures its second consecutive nomination. Last year TOSIBOX® [Virtual Central Lock](#) received an Honorable Mention in the Software - Applications category.

TOSIBOX® Lock 500 is the company's new flagship product that has entered the global market earlier this year with high demand. The full-featured connectivity device brings unprecedented possibilities for customers to manage their operations and to build new IoT solutions. Not only is the Lock 500 ideal for demanding industrial environments, but its additional options and performance opens new opportunities in security and corporate networking sectors.

"Our customers have received the Lock 500 with great enthusiasm. Thanks to its high performance, the Lock 500 boasts extreme usability and increased speed of communication. The product is now available with CE marking, and deliveries in the Americas will start very soon – after UL and FCC markings are added later this year. Good things come to those who wait," says **Jarno Limnell**, CEO at Tosibox.

The Control Engineering Award Winners and Honorable Mentions will be announced on February 14th, 2019. The winners and honorable mentions will be honored at the 2019 Engineering Awards in Manufacturing Dinner on April 8th, 2019 when they will be handed their trophies.

Tosibox will be exhibiting TOSIBOX® Lock 500 at [PACK EXPO International](#), the year's most comprehensive packaging event in the world taking place at McCormick Place in Chicago, IL on October 14-17, 2018. Tosibox can be found at booth E-11012.
