TOSIBOX® LOCK 500 WINS SMART BUILDING AWARD 2018

TOSIBOX® Lock 500 for secure IoT connectivity receives recognition in Cyber Security category at Smart Building Levante.

TOSIBOX® [Lock 500](#), the new flagship product of the Finnish company [Tosibox Oy](#) has won the award for Product Smart Building 2018 in the Cyber Security category. The Italian [Smart Building Levante](#) trade show awards the most innovative products of the year.

TOSIBOX® Lock 500 is a high-end connectivity device with massive VPN throughput and superior reliability. It brings new possibilities for users to manage their operations and to build new IoT solutions.

“The accelerating development of ubiquitous technology and the upcoming explosion of Internet of Everything (IoE) and the amount of data will mean greater demand for secure connectivity even in smart buildings, and that is what we want to offer. We are honored to receive yet another important recognition for our new product,” says **Jarno Limnell**, CEO at Tosibox.

In building automation, costs have been a bigger priority than cyber security, until now. The TOSIBOX® solution has simplified secure IoT connectivity, remote maintenance and network management for property owners and service providers. TOSIBOX® products are compatible with all building automation brands and providers in the market. The TOSIBOX® network transmits any form of data, regardless of the protocol.

The Lock 500 was [recently chosen](#) as a finalist for the Control Engineering 2019 Engineers’ Choice Award in the Industrial Internet of Things Connectivity category.

Smart Building Levante presents the technologies that will design the future of planning and living. The event will take place in Bari, Italy on November 22-23, 2018, and TOSIBOX® Lock 500 will be showcased by Tosibox partner [Telestar Srl](#).
