

Press release, April 10, 2019

TOSIBOX® LOCK 500 WINS CONTROL ENGINEERING POLAND'S PRODUCT OF THE YEAR 2018 AWARD

TOSIBOX® Lock 500, the flagship product of **Tosibox Oy**, the Finnish leader in secure industrial remote access solutions, receives the acknowledgement from Control Engineering Poland and shares 1st place in a tight competition for Product of the Year 2018.

The high-performance connectivity device TOSIBOX® Lock 500 was chosen Product of the Year 2018 in the Wireless Communication category. The candidates were determined by a professional preliminary jury, and the winners were voted by the readers of the magazine Control Engineering Poland.

The winners were presented with their awards at a ceremony held in conjunction of an Industry 4.0 event in Warsaw, Poland on Tuesday, April 9. **Dariusz Nowak**, owner of Pace Poland accompanied by Tosibox's Chief Technology Officer (CTO) **Pekka Sillanpää** were presented with the award at the event.

"This award is another confirmation for Pace Poland that we have opted for cooperation with the right business partner. I appreciate the commitment of Pace Poland's partners from Poland who share our values and I want to thank them for support. This award is also for you!" says Dariusz Nowak, owner of Pace Poland.

"One of the values defined in our strategy is that we trust in high quality and integrity. Our products comply with industry standards and are manufactured in Finland. These recognitions that our products win are confirmation that we have a first-class product. Poland is a familiar market area where we have been playing for some time, and our products have been well received there. We are honored that users appreciate our products and have chosen us as the winner. We are very close to starting deliveries for the Lock 500 in North America with FCC and UL markings, and I am thrilled to present such award-winning technology to one of our main markets," says **Jarno Limnell**, CEO at Tosibox Oy.

TOSIBOX® Lock 500 is a high-end connectivity device bringing unprecedented possibilities for customers to manage their operations and to build new IoT solutions. The product has received several accolades such as a [finalist position](#) in the Control Engineering 2018 Engineers' Choice Awards in the United States and [first place](#) in the Smart Building Award 2018 (in Cyber Security category) in Italy.

TOSIBOX® Lock 500 is available for EMEA and APAC regions (with CE marking) through Tosibox [Sales](#) and [distributors](#). The product will become available also in North America with FCC and UL markings soon.
